

Fruit Pest Management Workshop

Thursday July 15th, 10am to 3pm, At the Horticulture Field Lab. Registration begins at 9:30

Featuring: Clarence Peters, trained Entomologist and retired Sask. Ag. Fruit specialist
Assisted by Rick Sawatzky, Bob Bors and Forrest Scharf

Event includes:

Talks on:

- Most common insect pests and beneficials for fruit crops
- Rare insect pests to look out for
- Recent pest problems in SK
- Control methods, both chemical and biological

On Display:

- Clarence's extensive insect collection
- Samples brought by growers (please bring anything you want identified)
- Worthwhile books and references

In the field:

- Scouting, Trapping and other monitoring methods
- Signs of insect damage
- General tour of the fruit Program (while looking for insects)

Cost \$35

Bring your own lunch, bottled water provided
