Canadian Cherry Producers Inc. is non-profit corporation that encourages:

1. Development of a prairie cherry industry designed and managed by the growers based on University of Saskatchewan cherries.
2. Documenting best practices of growers and sharing expertise of research institutions to benefit all members.
3. Co-operative processing to maintain standards of efficiency and quality; and
4. Development of cherry production, value-added processing, and marketing opportunities for members

We believe in partnerships that will advance the ability of growers to sustain their farms. Together growers can tackle industry issues that would overwhelm individual endeavors.
